SAFETY CABINETS
[FOR FLAMMABLES]

FM APPROVED · CE · EN 14470-1

Standardized manufacture meeets OSHA 29 CFR 1910 and NFPA 30 that is strict in accordance with EN14470-1 Approval, issued by German third-party authority. A number of features, such as patented door construction, heavy-duty steel, unique design of flush top, and UV-resistant apoxy coating etc, build up superior safety cabinets in the industry.
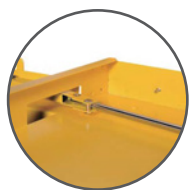

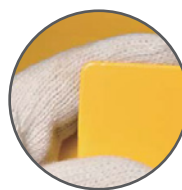

1 Quality epoxy coating
Excellent UV resistant, even covers the hidden areas

2 Anti-slippery handle
increase friction makes handling easy

3 Rounded safety corner
To reduce accidental cuts and potential injury.

4 Fully-wielded construction
Reduce dirt collection and zero wielding spot

SAFETY CABINETS
[FOR CORROSIVES]

FM APPROVED | CE | EN 14470-1

The safety cabinets for corrosives, along with the safety cabinets for flammables, have the same standardized framework, same high quality material and sophisticated craftwork. The epoxy coating of the cabinets withstand corrosion from acids and bases. Moreover, the polypropylene trays on top of the adjustable galvanized shelves, collecting unexpected leakage and spill are corrosion resistant.
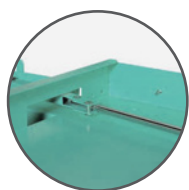

1 Quality epoxy coating
Excellent UV resistant, even covers the hidden areas

2 Polypropylene tray
Injected corrosion resistant tray is tenacious and durable

3 Rounded safety corner
To reduce accidental cuts and potential injury.

4 Fully-wielded construction
Reduce dirt collection and zero wielding spot

SAFETY CABINETS
[FOR HARSH CORROSIVES]

The cabinets are built by high quality polypropylene. Which is harsh corrosion ressistant. The complat wielding process makes easy cleaning and nice appearance, The stump at the bottom is 51mm in depth, collects unexpected leakage and spill.

Product	Capacity	Model	Style	Doors	Max Dimensions	Shelves	Weight

SPECIALTY CABINETS
[FOR TOXIC CHEMICALS]

Most noxious gas is of higher density than air. High concentration will jeopardize lives. Given more accidents are due to the leakage of noxious gas, specialty cabinets deals with the toxic chemicals. Flexible electronic lock and accurate seamless design assure high level of safety.

OIL WASTE CANS
[FOR OIL WASTE DISPOSALS]

FM APPROVED CE **EN** 14470-1

A variety of features such as the innovating link rod of the lid, the unique noise reduction design, self-closing lid, and heavy-duty steel etc, makes the products robust and durable, The containers is always closed when not in use, so as to isolate oily disposals from fires and eliminate combustion risks.

Product	Capacity	Colour	Outer Diameter (ΦDiameter x Height)

LIQUID PP CANS
[FOR LIQUID WASTE DISPOSALS]

FM APPROVED CE **EN** 14470-1

These are made of high density PP material, which can resist strong corrosive chemicals. The tank body is equipped with self-close mechanism, preventing dents, penetration and fragility cause by corrosion. The can stops ignition source from entering the body while operating the waste can.

Product	Capacity	Outer Diameter (ΦDiameter x Height)
602515	2.5 L	Φ301mm X 370mm
605015	5 L	Φ301mm X 500mm

SAFETY STORAGE CANS
[FOR FLAMMABLE LIQUID]

FM APPROVED CE **EN** 14470-1

These cans provides security for flammable liquid storage and offer easy pouring to protect site personnel and minimize the risk of accident. The ergonomic design and production has taken safety into adequate consideration to meet up with the regulations.

Product	Capacity	Outer Diameter (ΦDiameter x Height)
582513	2.5 L	Φ294mm X 303mm

DRUM CABINETS
[FOR FLAMMABLES]

FM APPROVED   **CE**   **EN 14470-1**
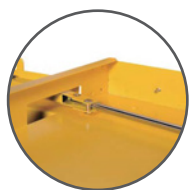

The drum cabinets are designed and built to the OSHA 29 CFR 1910.106 standard, and specialize in housing one or two drums. A particular feature stays with the double-drum roller. It is segregated into two units so that the drums does not affect each other during handling, and space utilization is also enhanced.

1 **Quality epoxy coating**
Excellent UV resistant, even covers the hidden areas

2 **Optional ramp & roller**
Easier unload and loading action

3 **Shelf hanger**
Offers "no-slip" stability, easy to adjust and leak proof

4 **Fully-wielded construction**
Reduce dirt collection and zero wielding spot

SAFETY CABINETS
[FOR COMBUSTABLES]

The safety cabinets for combustibles, along with the safety cabinets for flammables, have the same standardized framework, same high quality material and sophisticated craftwork. With more adjustable shelves the cabinets are adaptable to many common small containers for combustibles, such as spray cans and paint cans.

1 **Quality epoxy coating**
Excellent UV resistant, even covers the hidden areas

2 **Anti-slippery handle**
increase friction makes handling easy
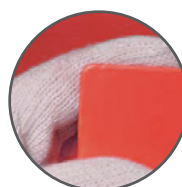

3 **Rounded safety corner**
To reduce accidental cuts and potential injury.

4 **Fully-wielded construction**
Reduce dirt collection and zero wielding spot

5 **Self- closing door**
Mechnism concealed in the top layer provides obstruction-free access

6 **Flame resistant vent**
reduce risks of amassing noxious gas.

7 **Safety handle**
For extra security and safety

8 **Adjustable leg**
Provides stability on uneven surfaces

SAFETY CABINETS

[FOR PESTICIDES]

Improper use of pesticides will cause great harm to workers. Filled with profession and care, presents the cabinets for this particular application. The cabinets contain solid steel walls and corrosion-resistant polyethylene trays. Not only effective for storage segregation of different pesticides, the cabinet also help to eliminate potential moisture and leakage.
